

# 2010 MYB Accident Protocol

The MYB board would like all managers and coaches to adhere to the following after an injury:

1. **IF THERE IS ANY DOUBT**, as to the severity of a child's injury, call 911.
2. Any injury that results in blood, doctors visit or hospitalization needs to reported to your player rep or another MYB board member ASAP.
3. In the event of an injury involving blood, the person responding must wear the latex gloves from the medical kit while helping the injured player. The blood should be wiped up with disposable towels and exposed skin should be wiped clean with a moistened alcohol based wipe.
4. After injured player is bandaged and clean up is complete, dispose of all towels, gloves, wipes, etc. in an approved trash receptacle.
5. Use your best judgement as to, if and when, an injury needs to be reported. If there are any doubts, do not hesitate to contact your player rep or a member of the MYB board.
